

TO Whom it may concern

For the upcoming Federal Election we request that your organisation considers the aims of The Great Australian Party with respect to the listed Roadmaps 1,2 and 3 in your "Commitments for the Federal Election 2019.

First and foremost we request that anyone with MS send to their local Federal member, of either the House of Representatives or Senate, a My Will request after the election. Then and only then can that member respond with a constructive reply based on real time real life remedies according to law, and according to the research that member has been compelled to investigate via the My Will request.

Roadmap 1,2 and 3.

1. Cures: Recent changes to the Private Health Insurance Act do not help the pursuit of any cures as the Liberal and Labor parties have taken away 17 recognised modes of health care as of April 1 2019. We are pursuing these draconian changes from those held responsible for implementing these changes. Research and development is mandatory in order to bring about a cure, but not only from the pharmaceutical industry but also from the other modes that have been discriminated against as a result of the changes to legislation.
2. Prevention: As mentioned above our party will focus on proper R&D spread, not only to pharma but inclusive of other age old modes of health care and research, inclusive of natural remedies.
3. Improve Management: Overseas models for health care will be seriously looked at with an eye to include in the R&D best possible health care alternatives which will make the life of those suffering with this disability easier.
4. NDIS: We will encourage that MS suffers feedback in the method outlined in the introduction to this email the issues that need addressing with the current NDIS scheme. Our job is to back check current legislation and current methods of implementing the scheme against section 51(xxiii) of the Commonwealth Constitution." (xxiiiA) the provision of maternity allowances, widows' pensions, child endowment, unemployment, pharmaceutical, sickness and hospital benefits, medical and dental services (but not so as to authorize any form of civil conscription), benefits to students and family allowances;"
5. Improve Employment Options and Workplace Flexibility: The Great Australian Party will examine and recommend any necessary changes to current workplace legislation making employment and workplace flexibility easier for MS and disabled workers. For the party to implement any changes we need the individual to instruct the member as to where there is any discrimination or where the worker is placed in a situation that is uncomfortable or places the worker in a dangerous situation.
6. Young People in Aged Care: Aged care facilities throughout the country have been under scrutiny for the past few years and this issue requires more community input and greater transparency. Placing young people in these facilities is a band aid method which needs rethinking and community feedback. People of all ages need to be in an environment that they feel comfortable with and not an environment that feels comfortable for the sake of convenience.

7. Maintain the momentum of aged care reform: The Great Australian Party insist that greater transparency and the fast implementation of community endorsed changes. The faster a change is implemented and approved the better it is for the benefit of the community and those who benefit from the change.

8. Help people to stay at home for as long as possible: An obvious solution to a growing need with our support to better help those who are better off at home. All home care services of course need to be regulated for security and health of the sufferer.

9. Equal Access to Assistive tech: The Great Australian Party will encourage that all governments will implement any changes to public transport, health care access, etc. without exercising any form of discrimination based upon the individuals disability. Research and Development of course plays a crucial roll in absorbing any new tech that can assist all modes of disability.
