

LET US THANK YOU

If you have already remembered MS Research Australia in your Will or are considering doing so, we would appreciate you letting us know so that we can thank you personally. However if you prefer to remain anonymous, please know that we are extremely grateful and encouraged to know that people like you are also dedicated to our vision of a world free of multiple sclerosis.

- ☐ I have already made a bequest to MS Research Australia in my Will
- ☐ I am considering making a bequest to MS Research Australia

A BEQUEST TO MS RESEARCH AUSTRALIA

However large or small, your bequest to MS Research Australia will make a difference.

It will allow Australia's leading MS researchers to focus their attention on finding the cause and cure for multiple sclerosis (MS). Medical research is moving rapidly and each new discovery takes us closer to our vision of a world free of MS.

Your generous bequest will be directed to the most appropriate areas of MS research that require funding, unless you have a specific project you would like to support.

ABOUT MS RESEARCH AUSTRALIA

MS Research Australia is the only national organisation dedicated to funding and coordinating MS research in Australia, as part of the worldwide effort to solve MS. Its goal is to accelerate research into the cause, better treatments and prevention, with the aim of ultimately finding a cure.

ABOUT MULTIPLE SCLEROSIS

MS is the most common neurological disease in young Australian adults, often diagnosed between the ages of 20 to 40, and affecting three times more women than men. As yet, there is no cure.

MS is the result of damage to myelin – a protective sheath surrounding nerve fibres of the central nervous system. When myelin is damaged, this interferes with messages between the brain and other parts of the body. The symptoms of MS are different for each person; sometimes they even vary within the same person. For some, MS is characterised by periods of relapse and remission, while for others it has a progressive pattern. For everyone, it makes life unpredictable.

A BEQUEST TO HELP FIND THE CAUSE AND CURE FOR MS

MS Research Australia recommends you seek legal advice when preparing or revising your Will. It is a legal document that allows you to advise how you would like your assets distributed.

This can include:

- **A specific bequest**

A gift of a specific nominated asset like a house or parcel of shares or a specific amount of money.

- **A percentage**

A nominated percentage of your Estate.

- **A residual**

What remains of your Estate after all debts have been paid and all other gifts distributed.

BEQUEST WORDING

'I bequeath to MS Research Australia Limited (ABN: 34 008 581 431) for its general purposes, ...(please include your bequest option here)... and I direct that the receipt of the Chief Executive Officer or Secretary of such organisation shall be a full and sufficient discharge to my trustee for the payment of such benefit.'
